# Reporting and Case Analytics for Prosecutors

Analyze your prosecution data—instantly.

CivicEye's software allows your prosecution office to better visualize, analyze, and share your prosecution outcomes and data. With a variety of filters and features, CivicCase for Prosecutors allows prosecutors to use data to inform their ongoing prosecution strategies and practices to best ensure justice. Learn more below about how CivicCase can improve your office's analytic access:
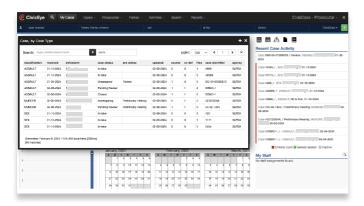

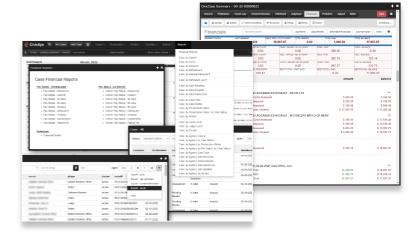

Inside CivicCase

Dashboard Reports and Tools

Quickly view case data in the CivicCase for Prosecutors dashboard, with a variety of data layouts and formats to analyze key information, such as key metrics (e.g., how many active cases, trials, and appeals your office currently has), while also simultaneously viewing important information such as recent case activity, case history in the past year. Additionally, system users can view real-time updates on the number of cases in the intake queue, cases assigned per prosecutor, case duration/case age, and more.

Report by Case Type

Create reports based on various data-field types, including case types/charges (e.g., assault, rape, murder, negligent injury, etc.)

Financial Reports

Create various financial reports *(left)* and access financial summaries *(right)* that can be used to track payments and outstanding balances associated with specific cases under the supervision of the PTI, Diversion, Worthless Checks, and/or Traffic Departments.
