

Securely collect, share, and manage digital evidence.

CivicDocs is a specialized digital evidence management platform designed to empower prosecutors and support staff in efficiently sharing and managing critical evidence.

The platform's built-in redaction, electronic signature, and confidential management features align with the unique needs of criminal justice officials, providing a transparent and efficient approach to eDiscovery. With a robust audit log feature, prosecutors can protect the integrity of digital evidence, and ultimately, improve the discovery process.

Benefits

Enhanced Transparency

Audit logs enable prosecutors to clearly document when, where, and by whom files were accessed.

Efficient Document Retrieval

System users can instantly search through countless files with advanced filtering and search tools.

Secure Data Handling

Protect sensitive information with user-based access restrictions within a CJIS-secure platform.

Key Capabilities

- eDiscovery with audit logs
- Law enforcement access portal
- Defense attorney access portal
- Security hash to validate documents
- Case timer feature
- Redaction tools
- Role-based login portals
- CJIS-secure, cloud-based system
- Scalable, adaptable platform
