

Centralize records and improve data access—all in one.

Designed and field-tested by law enforcement, CivicRMS is an intuitive, high-performance records management system. With its advanced integration capabilities, CivicRMS is the RMS to consolidate all of your software in a centralized platform.

CivicRMS allows agencies to securely store and access essential data, including dispatch information, incident reports, a master record index, and more. With this data centralization, agencies are empowered to extract insights from their records and make data-driven decisions to better serve and protect their communities.

Benefits

Efficient Data Tracking

Streamline the tracking of persons, places, and things with CivicEye's proprietary L.E.X. Master Index System.

Strategic Crisis Management

Access both real-time information and tactical emergency response maps and plans.

Simplified Warrant Creation

Automate warrant creation by auto-populating arrest record details and effectively track warrant service efforts.

Key Capabilities
