

Prosecution & Law Enforcement Collaboration

Share data—expedite justice.

CivicEye provides innovative technology that bridges the gap between law enforcement agencies and prosecutors, improving the transition of cases from investigation to prosecution. By creating technology that facilitates the secure transmission of case files and digital evidence, CivicEye ensures that critical information is shared efficiently and securely.

Law enforcement can easily view all of their agency's cases and create comprehensive case packages to deliver to prosecution teams digitally.

Prosecutors can instantly receive digital evidence from law enforcement and access related cases in a centralized platform.

Core Benefits

Expedite Case Transfer

- Directly transfer and receive all case files and digital evidence.
- Reduce delays and human error in the case intake process.

Enhance Data Security

- Protect data with encryption.
- Leverage unique login portals to safeguard against unauthorized access.

Improve Case Management

- Improve case organization with advanced search and evidence tagging.
- Minimize administrative tasks associated with case intake.

Increase Transparency

- Store case materials in a centralized, secure platform.
- Document the access of sensitive materials with detailed audit logs.
